Portfolio: this is my portfolio website

Professional Summary

A software engineer with 2 years of experience specializing in mobile application development using Flutter and dart. Passionate about building high-performance, user-centric applications that solve real-world problems. Adapt at exploring new technologies, decentralized cloud solutions, and management practices. Driven by innovation, cryptography, and a love for continuous learning.

Skills

Programming Languages: Python, Dart, JavaScript, TypeScript,java
Frameworks: Flutter, React Native
Tools & Platforms: Firebase, Git, Docker, REST APIs
Other Skills: Cryptography, Decentralized Cloud Technologies (e.g., Phala Network)
Soft Skills: Team Collaboration, Problem-Solving, Adaptability

Work Experience

Mobile App Developer OICT Solutions –currently
Developed and deployed cross-platform mobile applications using Flutter and React Native.
Optimized state management and API integration to improve app performance and scalability.
Collaborated with UI/UX designers to create intuitive and accessible interfaces.
Maintained project documentation and contributed to code reviews, ensuring high-quality code.

Education : Undergraduate degree in Software Engineering at Haramaya University

Projects

- **Malaria Detector App**
  Built a machine-learning-powered mobile application for detecting malaria from blood smear images.
  Utilized TensorFlow Lite for on-device model inference, providing fast and reliable results.
  Designed an intuitive UI for easy accessibility by medical professionals and researchers.
- **Recommender App**
  Developed a recommendation system-based application that curates personalized content for users.
  Integrated collaborative filtering and content-based recommendation algorithms.
  Ensured seamless user experience by optimizing performance and implementing real-time updates.
- **RentEase app**
  Created a fully functional house renting app using Flutter.
  Features include user authentication, real-time image sharing, and interactive social features like likes and comments.
  Leveraged Firebase for backend services, including storage and database functionalities.
- **Expense Tracker App**
  Designed a cross-platform app to help users manage personal expenses effectively.
  Implemented secure user authentication and real-time database syncing using Firebase.
  Achieved a user-friendly interface with advanced filtering and categorization options.

Decentralized Cloud Explorer
Experimented with decentralized cloud technologies, including Phala Network, to explore their potential.
Designed a conceptual mobile interface for managing and monitoring decentralized cloud storage.

Hobbies & Interests -> Exploring decentralized cloud technologies like Phala Network
-> Practicing ITF Taekwondo
-> Studying cryptography and cryptocurrency trends
-> Diving into management theories and practices
